

APPARATUS AND METHOD FOR PROVIDING A PERSONAL CENTRALIZED
DATA BASE ACCESSED USING COMBINED MULTIPLE IDENTIFICATION
NUMBERS

ABSTRACT

A centralized personal data base is disclosed that is accessible through the Internet and secured by a combination of identification numbers, including a basic, a primary and a secondary number. The secure personal data base is accessible to the user by the combination of the basic and a primary number. The secure personal data base is accessible to others who have been supplied with a primary and a secondary number.
